Welcome on Board!

For our factory in Bremerhaven we are searching for an/a

Intern/Working Student (m/f/d) - R&D Department -

As a modern production company focused on fish, we produce high quality food for the European market. Frozen Fish International GmbH is the largest frozen fish factory in the world. It is part of the Nomad Foods Group, which sells frozen foods under the Iglo, Findus, Lutosa, Birdseye and La Cocinera brands in a large number of European countries. The group has ten production sites, two of them in Germany. Nomad foods Europe is an equal opportunities employer.

We are currently looking for a Working Student/Intern in our R&D Department, typically for a 6 month placement/internship, but other placement/internship lengths will be considered.

Responsibilities:

- Run a scientific project(s) investigating key technical challenge areas for Nomad Foods
- Communicate remotely across sites (UK, DE, FR, IT) with R&D/other function colleagues
- Set up scientific tests, defining measurement methodology, recording and interpretation of data
- Proactive & timely communication of progress and issues
- Ensure all products/prototypes used for consumer research are safe and representative
- Generate accurate technical & scientific data

Requirements:

- Student of Food Science – or equivalent scientific discipline with a passion & knowledge of food
- IT-Skills and English language at advanced level
- Ability to work independently under own initiative with appropriate guidance & support
- Commitment and ability to work under pressure

Have we rised your interest? We look forward to receiving your E-mail application.
